Vers 10 – 20/12/2010

Implementation of EU Recommendation (2002/413/CE) ICZM and ICZM Protocol for the Mediterranean

QUESTIONNAIRE

On integrated coastal zones management implementation progresses

Introduction

MAREMED – Maritime Regions cooperation for Mediterranean, is a project started in 2010 and co-funded by the MED Programme, that involves 15 partners among Regions and local administrations from France, Italy, Spain, Greece and Cyprus together with the Conference of Peripheral Maritime Regions (CPMR)

The project is dealing with the following themes: maritime policy governance, the integrated management of coastal and maritime areas, fisheries, adaptation to climate change in coastal areas, efforts to reduce pollution and data management.

Its objective is to develop tools for enhancing and coordinating regional, European and Mediterranean policies on these six thematic strategies

Within the first work phase (the present one) it will be carried out an overview of the policies implemented and their governance by the project partners. In the second phase will identify pilot coastal zones in which promote transnational management initiatives and share operational tools to aid in decision-making for the six thematic strategies.

Preparation and aim of the Questionnaire

This questionnaire has been elaborated by Emilia-Romagna Region on the basis of the UE ICZM Recommendation and the ICZM Protocol for the Mediterranean. It has been presented to the EC DG Environment and integrated after this consultation. It has also been presented to PAP/RAC and compared with the Questionnaire elaborated in the 7th FP project Pegaso. The Questionnaire has been presented to the MAREMED partners in the meeting held in Marseille the last 26 November and has been modified/integrated on the basis of the discussion.

The aim of the Questionnaire is to create a picture of the coastal status, pressures, future trends in the MAREMED partners as well as in the European Regions that voluntarily will take part in this process.

The Questionnaire will contribute to create an informative framework useful for decision makers at regional, national and European level. It could contribute to the elaboration of the next financial period (2014-2020) related to ICZM implementation.

Questionnaire: Implementation of EU Recommendation (2002/413/CE) ICZM and ICZM Protocol for the Mediterranean

Vers 10 – 20/12/2010

The outputs of the Questionnaires will be made available to the European Commission for the impact assessment evaluation on ICZM that is currently ongoing.

The results will be also published and forwarded to UNEP MAP PAP/RAC in Split and to other relevant actors in ICZM implementation in the Mediterranean as well as in Europe.

Partners and voluntary regions are kindly asked to fill-in the questionnaire and send back it to Emilia-Romagna Region before the 28th of January in your language and before the 15th of February in English 2011.

What is ICZM?

The international and EU Community framework in ICZM matter it is constituted mainly by the followings:

- the 1976 Barcelona Convention for marine environment protection in the Mediterranean sea, last amended in 1995, and relative Protocols (ICZM Protocol on integrated coastal zone management, LBS Protocol on pollution from land-based sources and activities, SPA/BD Protocol concerning specially protected areas and biological diversity;
- the Recommendation concerning the implementation of integrated coastal zone management in Europe (2002/413/CE);
- the Framework Directive on the European strategy for the marine environment (2008/56/CE).

The ICZM protocol was signed by all the Mediterranean Countries and by the EU on the 21st January 2008 in Madrid. It is now in the ratification process by each Country. The EU ratified it on the 13th of September 2010, and it is now binding for Member States.

Following the definitions contained in the ICZM Protocol:

“Integrated coastal zone management” means a dynamic process for the sustainable management and use of coastal zones, taking into account at the same time the fragility of coastal ecosystems and landscapes, the diversity of activities and uses, their interactions, the maritime orientation of certain activities and uses and their impact on both the marine and land parts.

“Coastal zone” means the geomorphologic area either side of the seashore in which the interaction between the marine and land parts occurs in the form of complex ecological and resource systems made up of biotic and abiotic components coexisting and interacting with human communities and relevant socio-economic activities.

Following EUROSION definition:

“coastal Resilience” means the inherent ability of the coast to accommodate changes induced by sea level rise, extreme events and occasional human impacts, whilst maintaining the functions fulfilled by the coastal system in the longer term. (The concept of resilience is particularly important in the light of the predictions for climate change).

Questionnaire: Implementation of EU Recommendation (2002/413/CE) ICZM and ICZM Protocol for the Mediterranean

Vers 10 – 20/12/2010

Questionnaire Sections

0 – Status of coastal areas

Information on coastal area status with reference to the geomorphologic and environmental indicators and to the main human activities and pressures.

1 – Summary

Synthesis description of initiatives undertaken and progress achieved in ICZM process implementation and of ICZM strategy tool adopted. Information about ICZM Protocol ratification and eventual undertaken initiatives.

2 – Activities undertaken in order to support ICZM implementation

Information for deepening some aspects described in the summary of Section 1

3 – Evaluation on ICZM progresses and coastal zone governance status

Information aimed to give an overall evaluation of progresses achieved in terms of ICZM principles and strategy implementation, governance and sustainable development of coastal zone

4 – Governance of ICZM

See the enclosed Questionnaire “Governance of ICZM”.

5 - Information on questionnaire compilation

Information on questionnaire compilation procedure, subjects involved and contact person

SECTION 0 – Status of coastal areas

In this section the partners describe the status of their coastal areas with reference to the geomorphologic and environmental indicators and to the main human activities and pressures. The ICZM Protocol provisions related to the coastal system will be also evaluated.

Note: From the ICZM Protocol

Article 3

GEOGRAPHICAL COVERAGE

1. The area to which the Protocol applies shall be the Mediterranean Sea area as defined in Article 1 of the Convention. The area is also defined by:
 - (a) the seaward limit of the coastal zone, which shall be the external limit of the territorial sea of Parties; and
 - (b) the landward limit of the coastal zone, which shall be the limit of the competent coastal units as defined by the Parties.
2. If, within the limits of its sovereignty, a Party establishes limits different from those envisaged in paragraph 1 of this Article, it shall communicate a declaration to the Depositary at the time of the deposit of its instrument of ratification, acceptance, approval of, or accession to this Protocol, or at any other subsequent time, in so far as:
 - (a) the seaward limit is less than the external limit of the territorial sea;
 - (b) the landward limit is different, either more or less, from the limits of the territory of coastal units as defined above, in order to apply, *inter alia*, the ecosystem approach and economic and social criteria and to consider the specific needs of islands related to geomorphological characteristics and to take into account the negative effects of climate change.
3. Each Party shall adopt or promote at the appropriate institutional level adequate actions to inform populations and any relevant actor of the geographical coverage of the present Protocol.

Article 8

PROTECTION AND SUSTAINABLE USE OF THE COASTAL ZONE

1. In conformity with the objectives and principles set out in Articles 5 and 6 of this Protocol, the Parties shall endeavour to ensure the sustainable use and management of coastal zones in order to preserve the coastal natural habitats, landscapes, natural resources and ecosystems, in compliance with international and regional legal instruments.

Questionnaire: Implementation of EU Recommendation (2002/413/CE) ICZM and ICZM Protocol for the Mediterranean

Vers 10 – 20/12/2010

2. For this purpose, the Parties:

- (a) Shall establish in coastal zones, as from the highest winter waterline, a zone where construction is not allowed. Taking into account, *inter alia*, the areas directly and negatively affected by climate change and natural risks, this zone may not be less than 100 meters in width, subject to the provisions of subparagraph (b) below. Stricter national measures determining this width shall continue to apply.
- (b) May adapt, in a manner consistent with the objectives and principles of this Protocol, the provisions mentioned above:
 - 1) for projects of public interest;
 - 2) in areas having particular geographical or other local constraints, especially related to population density or social needs, where individual housing, urbanisation or development are provided for by national legal instruments.
- (c) Shall notify to the Organization their national legal instruments providing for the above adaptations.

ICZM Protocol

0.1

Did you officially defined the coastal area?
 If yes, how is it defined (i.e. 500 m or 1500 m from seashore, administrative boundaries, public domain...)?
(also with reference to ICZM Protocol)

<input checked="" type="checkbox"/>	No
	If no, is its definition in process?
	Please describe
	Yes
	In Cyprus there is no single legal or functional (planning) definition of the "coastal zone" or "coastal area". There are three main widely used geographical definitions referring to "coastal zone / area", each one related to the purposes of a different law and institutional context.

Questionnaire: Implementation of EU Recommendation (2002/413/CE) ICZM and ICZM Protocol for the Mediterranean

Vers 10 – 20/12/2010

<p>0.1a Did you define a coastal belt where buildings are forbidden? (i.e. Article 8 - ICZM Protocol, 100 m)</p>	<input checked="" type="checkbox"/> No
	<input type="checkbox"/> Yes <p>In Cyprus there is no single legal or functional (planning) definition of the “coastal zone” or “coastal area”. There are three main widely used geographical definitions referring to “coastal zone / area”, each one related to the purposes of a different law and institutional context.</p> <p>1. The Foreshore Protection Law defines the “foreshore” as “all lands within 100 yards of the high water mark”. The foreshore area is public property falling under the jurisdiction of this Law.</p> <p>2. The New Tourist Policy of 1990 (under the Tourism Hotel Accommodation Law and the TCPL) designated a “zone” of 3 km. from the coastline for the purposes of control of tourism development.</p> <p>3. The Coastal Protection Study of the Coastal Unit of the Ministry of Communications and Works adopted for the purposes of the survey of coastal erosion problems a definition of the “coastal strip” as the area of 2 km. from the coastline.</p>

Vers 10 – 20/12/2010

<p>0.21 How is the quality of life in the coastal area?</p>	<div style="border: 1px solid black; padding: 5px; margin-bottom: 10px;"> Please specify (making references to national and European ranking reports) </div> <p>Cyprus has come in 25th out of 175 countries in the UN's annual Human Development Index measuring quality of life across the world. In working out the best place to live, the report seeks to go beyond per-capita-income, and includes factors such as educational levels, health care, and life expectancy in order to measure a nation's wellbeing. Cyprus rank has risen steadily over the last two decades since it was first included in the study in 1980.</p>
<p>0.21a What is the GDP per capita?</p>	<div style="border: 1px solid black; padding: 5px; margin-bottom: 10px;"> Please specify </div> <p>Per capita GDP income for 2009 was \$31,003</p>
<p>0.21b What is the average price of houses?</p>	<div style="border: 1px solid black; padding: 5px;"> Please specify The average price in the coastal areas for the houses is around €250.000. </div>
<p>0.22 Describe the quality of life, the social conditions and the economic situation in the coastal area</p>	<div style="border: 1px solid black; padding: 5px;"> Please specify </div>

SECTION 1 – Summary

1.1 - With reference to regional competences / or policies / or knowledge/ please provide a synthesis of initiatives undertaken and progress achieved, that can be led back to ICZM principles and objectives.

Please provide a brief description of Recommendation 2002/413/CE implementation process in your coastal zone.

Please give explicit indication on the chosen strategy and the tool finally/eventually adopted (i.e. ICZM Regional Strategy, ICZM Regional Action Plan, other forms...)

Indicatively no more than 400 words

Coastal Area Management Programme (CAMP) of Cyprus is a programme implemented jointly by United Nations Environment Programme – Mediterranean Action Plan (UNEP-MAP) and the Government of Cyprus through the Ministry of Agriculture, Natural Resources and Environment.

The goals of ICZM of Cyprus are to attain sustainable development of coastal and marine areas; to reduce vulnerability of coastal areas and their inhabitants to natural hazards; and to maintain essential ecological processes, life support systems and biological diversity in coastal and marine areas.

The CAMP must be a comprehensive strategy for the coastal area taking into account the ecological, biological, socioeconomic, and governance linkages between different portions of the coastal area, encompassing adjacent watersheds and offshore ocean areas. It integrates biodiversity conservation goals with the need to allow sustainable uses and socioeconomic development in coastal and marine areas under a planning and management framework.

The main objective of this Activity is to review and elaboration of the existing coastal development problems in Cyprus in relation to the prevailing international, national and local institutional, policy framework and commitments, development and application / testing of guidelines for the operation of ICAM methodology and formulation of practical proposals for the incorporation of ICAM within the Cyprus policy framework.

The five sub-activities include:

1. Collection and codification of all available information from the involved Ministries / Departments setting out the current coastal area planning and management institutional and policy framework, legal / regulatory tools, practices and problems in Cyprus, and, on this basis, review of the main deficiencies in the management of coastal development in Cyprus.

2. Elaboration of the established and evolving methodology / methodologies and tools of Integrated Coastal Area Management (ICAM) with reference to the Mediterranean and European experience, including their achievements and problems, and assessment of the need and options for an ICAM methodology in Cyprus.

3. Formulation of ICAM Guidelines to address existing and future coastal development conflicts and problems in Cyprus, including a guiding framework for the implementation of the Activities concerning the ICAM tools (CCA, SEA and EE) and the Pilot Application Case Studies).

4. Workshop(s) to present and discuss the results of sub-activities 1, 2 and 3 focusing particularly on the proposed ICAM Guidelines:

Questionnaire: Implementation of EU Recommendation (2002/413/CE) ICZM and ICZM Protocol for the Mediterranean

Vers 10 – 20/12/2010

5. Within the framework of all the above, formulation of proposals for the incorporation of ICAM within the Cyprus policy framework to support sustainable use of coastal resources in Cyprus.

In addition please indicate if your Country (EU member State) has ratified the ICZM Protocol (signed in Madrid January 2008) and, if the case, describe which actions/initiatives have been undertaken following the Protocol ratification.

Cyprus has not signed the Protocol because of some political disagreements which they had during the preparation of the Protocol. Several governmental departments which are involved with the Coastal Zone Management they express their opinion during the preparation of the Protocol which it was signed by a lot of Mediterranean countries.

SECTION 2 – Activities undertaken in order to support ICZM implementation.

These questions are aimed to deepen some aspects describe in the previous section 1.

--	--

Questionnaire: Implementation of EU Recommendation (2002/413/CE) ICZM and ICZM Protocol for the Mediterranean

SECTION 4 – Governance of ICZM

Questionnaire: Implementation of EU Recommendation (2002/413/CE) ICZM and ICZM Protocol for the Mediterranean

Vers 10 – 20/12/2010

Please go to the Questionnaire “Governance of ICZM” prepared by the Maremed LP and enclosed to this document.

SECTION 5 – Information on questionnaire compilation

In this section we ask to briefly describe the compilation procedure for this questionnaire.

Question	Information																						
<p>5.1 Who was involved in completing the questionnaire?</p>	<table border="1"> <tr><td><input checked="" type="checkbox"/></td><td>Central office</td></tr> <tr><td><input type="checkbox"/></td><td>Relevant departments</td></tr> <tr><td><input type="checkbox"/></td><td>Local municipalities</td></tr> <tr><td><input type="checkbox"/></td><td>Environmental organizations</td></tr> <tr><td><input type="checkbox"/></td><td>Economic partners</td></tr> <tr><td><input type="checkbox"/></td><td>Social partners</td></tr> <tr><td><input type="checkbox"/></td><td>Residents of coastal areas</td></tr> <tr><td><input type="checkbox"/></td><td>NGOs</td></tr> <tr><td><input type="checkbox"/></td><td>Organizations in the economic sector</td></tr> <tr><td><input type="checkbox"/></td><td>Other stakeholder (please specify): _____</td></tr> <tr><td><input type="checkbox"/></td><td>Other (please specify):</td></tr> </table> <p>Comments (please highlight eventual problems and/or opportunities):</p>	<input checked="" type="checkbox"/>	Central office	<input type="checkbox"/>	Relevant departments	<input type="checkbox"/>	Local municipalities	<input type="checkbox"/>	Environmental organizations	<input type="checkbox"/>	Economic partners	<input type="checkbox"/>	Social partners	<input type="checkbox"/>	Residents of coastal areas	<input type="checkbox"/>	NGOs	<input type="checkbox"/>	Organizations in the economic sector	<input type="checkbox"/>	Other stakeholder (please specify): _____	<input type="checkbox"/>	Other (please specify):
<input checked="" type="checkbox"/>	Central office																						
<input type="checkbox"/>	Relevant departments																						
<input type="checkbox"/>	Local municipalities																						
<input type="checkbox"/>	Environmental organizations																						
<input type="checkbox"/>	Economic partners																						
<input type="checkbox"/>	Social partners																						
<input type="checkbox"/>	Residents of coastal areas																						
<input type="checkbox"/>	NGOs																						
<input type="checkbox"/>	Organizations in the economic sector																						
<input type="checkbox"/>	Other stakeholder (please specify): _____																						
<input type="checkbox"/>	Other (please specify):																						
<p>5.2 Who was involved in the (Section 3) assessment of progress in implementing ICZM?</p>	<table border="1"> <tr><td><input checked="" type="checkbox"/></td><td>Central office</td></tr> <tr><td><input type="checkbox"/></td><td>Relevant departments</td></tr> <tr><td><input type="checkbox"/></td><td>Local municipalities</td></tr> <tr><td><input type="checkbox"/></td><td>Environmental organizations</td></tr> <tr><td><input type="checkbox"/></td><td>Economic partners</td></tr> <tr><td><input type="checkbox"/></td><td>Social partners</td></tr> <tr><td><input type="checkbox"/></td><td>Residents of coastal areas</td></tr> <tr><td><input type="checkbox"/></td><td>NGOs</td></tr> <tr><td><input type="checkbox"/></td><td>Organizations in the economic sector</td></tr> <tr><td><input type="checkbox"/></td><td>Other stakeholder (please specify): _____</td></tr> <tr><td><input type="checkbox"/></td><td>Other (please specify):</td></tr> </table> <p>Comments (please highlight eventual problems and/or opportunities):</p>	<input checked="" type="checkbox"/>	Central office	<input type="checkbox"/>	Relevant departments	<input type="checkbox"/>	Local municipalities	<input type="checkbox"/>	Environmental organizations	<input type="checkbox"/>	Economic partners	<input type="checkbox"/>	Social partners	<input type="checkbox"/>	Residents of coastal areas	<input type="checkbox"/>	NGOs	<input type="checkbox"/>	Organizations in the economic sector	<input type="checkbox"/>	Other stakeholder (please specify): _____	<input type="checkbox"/>	Other (please specify):
<input checked="" type="checkbox"/>	Central office																						
<input type="checkbox"/>	Relevant departments																						
<input type="checkbox"/>	Local municipalities																						
<input type="checkbox"/>	Environmental organizations																						
<input type="checkbox"/>	Economic partners																						
<input type="checkbox"/>	Social partners																						
<input type="checkbox"/>	Residents of coastal areas																						
<input type="checkbox"/>	NGOs																						
<input type="checkbox"/>	Organizations in the economic sector																						
<input type="checkbox"/>	Other stakeholder (please specify): _____																						
<input type="checkbox"/>	Other (please specify):																						
<p>5.3 Contact person who may be contacted for any clarification.</p>	<p>Name: Joanna Constantinidou Position: Environmental Officer Office: Ministry of Agriculture, Natural Resources and Environment Service Phone: + 357 22 408920 Mobile: E-mail: iconstantinidou@environment.moa.gov.cy Address: 28th Octovriou ave. ,2414, Nicosia, Cyprus</p>
