COOPERATION FOR THE
MEDITERRANEAN

FISHING QUESTIONNAIRE

COMPONENT 2: DIAGNOSTIC PHASE

STATE OF APPLICATION OF THE PRINCIPAL MARITIME POLICIES IN THE PARTNERSHIP

MARCHE REGION

We thank each partner to answer to this questionnaire in function of its reality and explain
the situation in its coastal zone.

We will organize a meeting in April for this working group to valorize your answers and
prepare our future actions.

DIAGNOSIS OF THE REGIONAL FISHERIES DIMENSION:

a. MAPS OF COASTAL COMMUNITIES DEPENDENT ON FISHERIES ACTIVITIES. Please provide information about:

WE DON'T HAVE ANY AREA DECLARED AS DEPENDENT OF FISHERIES ACTIVITIES

- The type of area (islands; sparsely populated area; remote small-scale fishing port or adjoining main regional ports; inland; etc...)
- number of inhabitants;
- surface;
- Size and type of the fleet;
- Employment per sector: fishing; aquaculture (shellfish aquaculture), processing/marketing;
- Type of Employment: % of young/male/women
- Is any regional/local indicator on fishing activities dependency available?
- Data on scrapping
- Main data and size of the local fishing market (how sale is managed; any input available on volume of sales
- Direct selling (where available)

- how to make compulsory the management plans for everybody (interregional & transnational dimension)?

Mis en forme : Retrait : Gauche : 1,9 cm

Mis en forme : Couleur de police : Rouge

Adobe Acrobat Document

- any regional plans already implemented at regional level (duration of the plan; areas covered; procedure for selecting area; targeted resources; etc...);

Adobe Acrobat Document

- type of consultation established with private sector and scientific world;
- any documents or guide dealing with procedure for setting up, idea development and implementation of the plans in your region (if they are available);

Adobe Acrobat Document

- please indicate if any idea of interregional management plan is being explored. If it so, could you go through details about:

- ✓ if any public consultation has been made to involve the private sector and scientific world before the launch of the management plans; yes
- ✓ which joint methods allowed for selection of the fisheries areas (if this was the case);
- ✓ who is responsible for management and follow-up of the plans (e.g. new interregional bodies; regional developments agencies; private organisation; etc...) public regional administration

d. TOWARDS A NEW CONCEPTION OF FISHING ACTIVITIES AT REGIONAL LEVEL. Please provide information about:

- any ex ante evaluation or study made to figure out how to better link fishing to ICZM and the local economy; No
- any possible legal problems affecting coordination between fishing activities and all other activities playing a role in the coastal economy (e.g. tourism; energy production; environmental protection; marine transport; etc...). Actually, There is no problem of coordination. There is a Regional Comission to avoid it.
- any experimentation underway of ICZM taking also into account fishing activities (please add further information about strategies and main objectives expected); No
- any Pilot action developed in your region to better link fishing to the local tourist economy; One action developed at local level (council of Aguilas)
- fisheries data collected in your GIS system if you have, or in a special database. No

e. TERRITORIAL STRAND OF THE CFP: A NEW SCENARIO FOR FISHING. Please provide information about:

- system at the basis of the implementation of Axis 4 in your country/region (who is responsible for what) how your region could improve its role in the implementation of the EFF/Axis 4; We don't have axis 4.
- to what extent and how do regional and/or local government and their development strategy take into account Axis 4 and its eligible actions;
- any aspects you would like to change in Axis 4 management and eligible actions;

Mis en forme : Couleur de police : Bleu

- what is your opinion about the current role played by Axis 4: should Axis 4 cover broader areas on 2014-2020? If it so, which criteria should be at the basis of their selection? We think that axis 4 must be an arm of the Rural Policy, by extending rural groups to the coast in order to simplify their structure and improve the way that they works.
- any coordination done between the territorial strand of the CFP and the other European policies (namely relationships between ERDF/ESF/EARDF/EFF (Axis 4). Please provide concrete examples or make reference to debates/reflections developed in your region on this.
- adding value to fisheries and aquaculture/shellfish products and diversification activities (e.g. pescaturism; ititurismo; etc). Please specifically focus on:
 - ✓ any specific national or local regulation supporting adding value and diversification; Pescatourism in Murcia
 - ✓ local systems to adding value to fisheries and aquaculture and shellfish products: direct selling; marketing; participation in fisheries fairs; etc... Local trade for commercialization of local fishes.
 - ✓ budget and the share of regional, national and European co-financing. If the activity is run under Axis 4 of the EFF, please add further information about: The mention activities of the previous paragraph are not under axis 4.
 - nature of the partnership (role played by the FLAGS; level of involvement of the private sector etc...)
 - any project supporting Inter-Flags cooperation;

f. FINANCIAL ASPECTS. Please provide information about:

- Volume of public aid:
 - o regional, 15 Meuros
 - o national, 7 Meuros
 - o European aids, 22 Meuros
- Could you quote a couple of best practises of EFF implementation in your Region? Our Management System for EFF is under ISO 9001, and ISO 17020.
- To what extent is EFF a value added for your region? There wouldn't be Common Policy without a financial tools like EFF, if we really want to reach a sustainability exploitation of the resources under an umbrella at the same time of an even principles of economical and social approaches.
- Which main pillars or axis should be expected from EFF after 2013?
- The global crisis has provoked a dessaceralation of the implementation of the program EFF 2007-13. We will need an extension, an overtime to finish first the current program and later we could think deeply in the new program. But for us, every axis or measures in the forthcoming program must take in account the principle of "ECOCONDICIONALITY" in order to permit the acces to subventions, only for those who respect environmental, rules, welfare, public heath, and so on...
